Preventive Maintenance (PM) includes disassembly, cleaning, inspection, re-assembly, and test.

PM, Calibration & Minor Repair includes disassembly, cleaning, inspection, minor repairs (tool trigger replacement, square drive retaining pin repair, cosmetic repair, etc.), re-assembly, test, and ISO17025 Calibration.

All other repair activities are covered under **Full Repair**.

UNREPAIRABLE TOOLS:

Occasionally, due to the age of a tool or the wear and damage to a tool it will cost more to repair than the cost of a new tool. In this case it will be declared unrepairable and returned to the customer.
