

## Corporate responsibility focus

Atlas Copco has grouped its main sustainability activities in three dimensions. All are important, but the third dimension, to reengineer the larger industrial environment and set new standards, will potentially have a greater positive impact on the environment.

Corporate responsibility	1. Community engagement (Philanthropy)	2. Reengineer within 'the family' (Internal processes)	3. Reengineer the larger environment (Industry standards)
<b>Social/ employees</b>	<ul style="list-style-type: none"> <li>• Natural disaster support</li> <li>• Support to orphanages and students</li> <li>• Fighting diseases</li> <li>• <i>Water for All</i></li> <li>• Many local projects, e.g. Sunshine school in China</li> </ul>	<ul style="list-style-type: none"> <li>• Supplier evaluations</li> <li>• Customer assessments</li> <li>• Safe and healthy work place, no work-related accidents and low sick-leave, OHSAS 18001, HIV/AIDS program</li> <li>• Competence development</li> <li>• Gender diversity program</li> <li>• Safety, Health and Environment (SHE) Council</li> </ul>	<ul style="list-style-type: none"> <li>• Safe drilling methods</li> <li>• Safe tightening</li> <li>• Knowledgeable and efficient service</li> <li>• Ergonomics, less vibration and noise</li> <li>• Elektronikon, user-friendly compressors</li> </ul>
<b>Environmental</b>	<ul style="list-style-type: none"> <li>• Lecturers at universities and technical schools on energy-efficient products</li> <li>• Supply compressors that help clean water, waste-water treatment</li> </ul>	<ul style="list-style-type: none"> <li>• ISO14001 in all production units</li> <li>• EMS for all employees</li> <li>• Environmental car policy</li> <li>• Supplier evaluations</li> <li>• Customer assessments</li> <li>• Targets in all product development projects</li> <li>• Safety, Health and Environment (SHE) Council</li> </ul>	<ul style="list-style-type: none"> <li>• Compressors with less energy consumption and oil-free compressors with clean air, less maintenance</li> <li>• Innovation of mining methods</li> </ul>
<b>Business</b>	<ul style="list-style-type: none"> <li>• Partnership with technical schools and universities</li> <li>• Apprenticeships</li> <li>• Employer branding, e.g. student days</li> </ul>	<ul style="list-style-type: none"> <li>• Customer satisfaction surveys</li> <li>• Business ethics</li> <li>• Product responsibility</li> <li>• Application stories on products and solutions</li> <li>• Service level agreements</li> </ul>	<ul style="list-style-type: none"> <li>• Launch of new, innovative products and solutions that shape regulations and push the industry to adapt to new standards, e.g. compressors with variable speed drive or with built-in energy recovery, remote monitoring and AirScan</li> <li>• Participation in the development of ISO 26000 guiding standard</li> </ul>
