

Contingency Planning Specialty Rental

Risk Management Planning for on site Compressed Air Systems

A diverse range of compressed air applications

Specialty Rental strengths

Meeting the needs of industry Atlas Copco Specialty Rental provides equipment with **low emission diesel engines and electric-driven compressors.**

The rental air source Atlas Copco Specialty Rental can **eliminate pressure bottlenecks** in your pipe system with properly positioned rental equipment.

Contingency planning

You need to have a contingency plan in place for unscheduled or emergency situations such as natural disasters.

Let one of our experienced representatives design a plan that matches your specific needs.

It's all about solutions.

Industry turns to Atlas Copco Specialty Rental because it delivers with individualized solutions that work

Should your main compressed air supply go down, you want to be prepared. Atlas Copco Specialty Rental can make sure ahead of time that you're ready to respond promptly. We'll work with you to develop and implement a contingency plan, determining the exact equipment and specification you'll require on a moment's notice. With our assistance plan in place, in the event of a failure, your downtime will be minimized and operations will continue.

Clean air

Atlas Copco Specialty Rental has extensive experience fulfilling the temporary air requirements of industry. We know how important the quality of air is to you, air that is clean and free of contamination. Our 100% oil-free compressors meet your toughest standards. These high-performance compressors are environmentally compatible by helping to reduce or eliminate emissions. Their reliability is certified by the Atlas Copco name.

Air supply

Diesel driven, electric, and high-pressure; our diversity and range of equipment allow us to create an individualized solution to your specific needs by providing single or multiple air compressors supplemented by all necessary accessories. Whatever your requirements for delivered air, your best temporary or long-range solution is Atlas Copco Specialty Rental. Customers know us for our quick response time and our ability to put together the right combination of reliable equipment to do the job professionally.

A diverse range of compressed air solutions

Contingency plan – what you get.....

Already a leader in the field of oil-free air compression technology, Atlas Copco asked the internationally recognized Technical Monitoring Association TÜV to type-test the Z-range and the PT/PN-range of oil-free screw compressors. They were submitted to the most rigorous testing methodologies available.

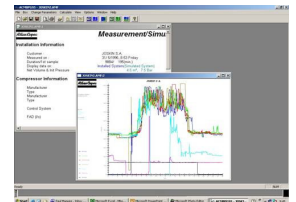

The TÜV found no traces of oil in the output air stream. Atlas Copco has thereby become the first compressor manufacturer to receive certification for a new industry standard of air purity:

ISO 8573-1 CLASS 0

Compressed air system survey

Step one is to establish your compressed air demand. We use sophisticated measurement techniques to establish your actual compressed air usage and air quality requirements. This takes the guess work out of selecting the correctly optimised combination of rental equipment for your contingency plan.

A three phase plan

We then evaluate our fleet and prepare a phased plan depending on the number of rental units required for your site. We can draw from fleet on a local, national and even international basis, and will include estimated timing on delivery of all equipment. We'll then advise the space requirements and recommend tap-in points to your system.

Not just compressors

As well as the logistics of delivering the correct equipment to site, we understand the importance of environmental and safety considerations. Part of the planning process is to consult with your safety and environmental people to ensure our temporary installation complies with your requirements. For example, the temporary installation may require lighting & fencing.

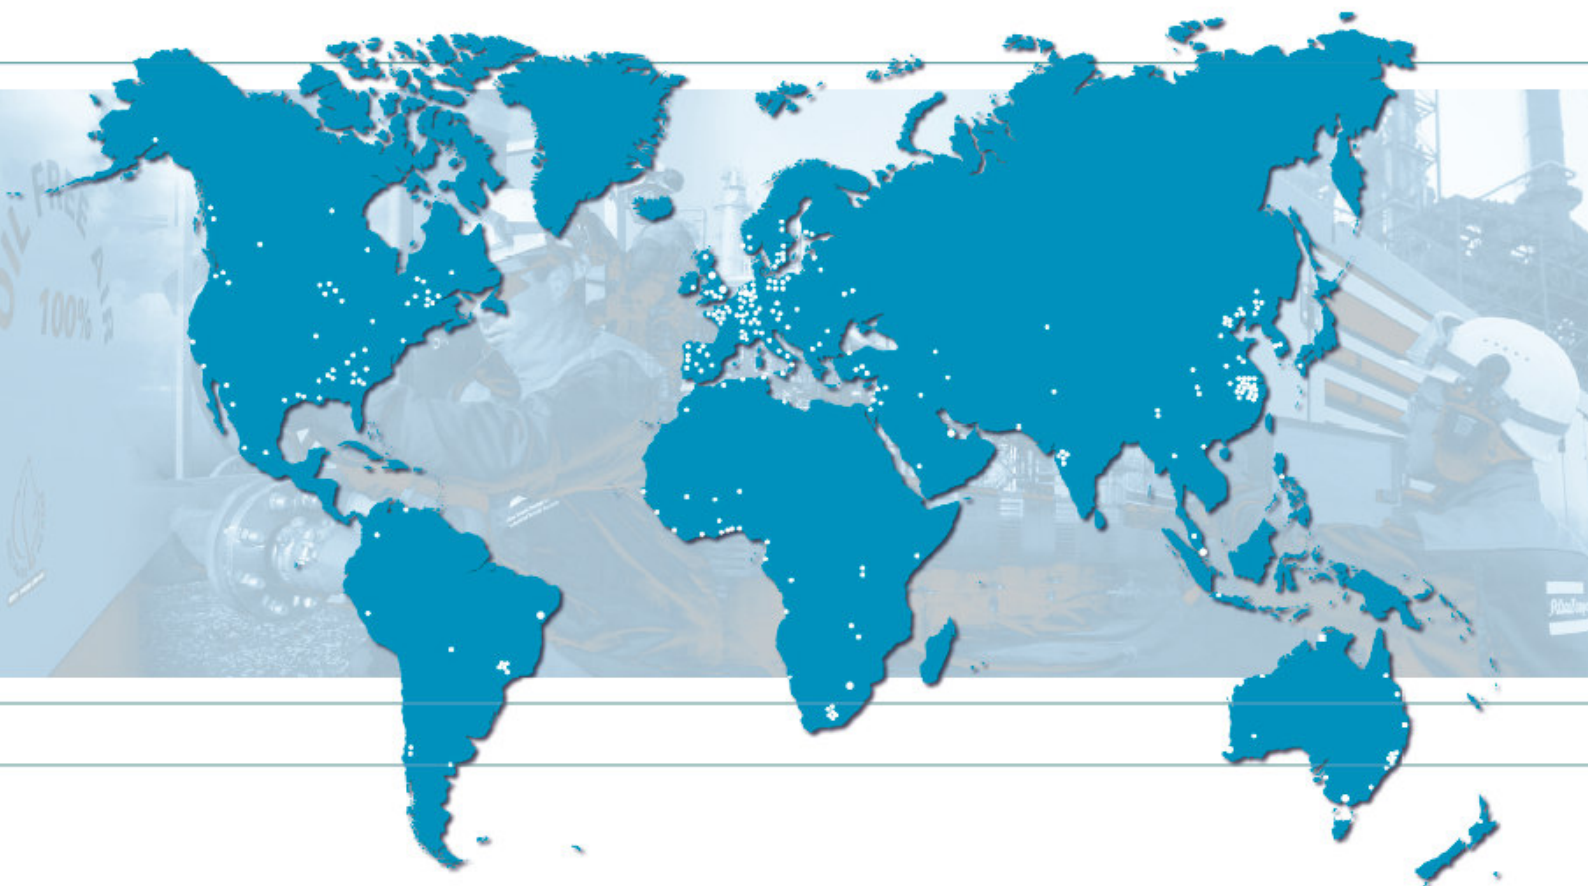

We care about the environment

Depending on the number of units required for the temporary installation, around-the-clock refuelling and maintenance may be required and fuel or oil spills are a potential hazard. We minimise these risks by using internal spill containment on all compressors. Additionally, we can supply external fuel tanks to reduce the frequency of refuelling.

Atlas Copco Specialty Rental.

Your number one rental resource. Always available, 24/7.

a global rental network

Tough Standards

The Specialty Rental Division has been granted triple certification to ISO 9001:2000, ISO 14001:2004 and OHSAS 18001 for Quality, Environmental and Occupational Health & Safety Management by Lloyd's Register Quality Assurance (LRQA). This triple certification demonstrates our commitment to the quality of our services, our care for the environmental impact of our operations and the health of our employees and customers.
