

Available **24/7**

a **global** rental network

Atlas Copco Specialty Rental Australia

Each new customer request triggers a streamlined logistics process. Our specialists design the best solutions for your specific needs. Thanks to our strategic network of rental depots and service centers, we can deliver a virtually unlimited range of generators within hours.

We verify the availability of our machines and arrange their transport. Our service specialists keep track of all maintenance requirements. They ensure that your machines stay in top condition and are always ready to provide on-site assistance. According to your wishes, they will handle all your maintenance needs so you can focus on your production activities while receiving an uninterrupted power supply.

Our dedicated professionals are always on the move, delivering high quality, 24/7 service. You can count on them to deliver the power you need, where and when you need it.

Quality, health, safety and the environment - today and for future generations - are a top priority for our company, and while we can't influence and change what our competitors do, we can at least set the standard which will be judged by you, the customer.

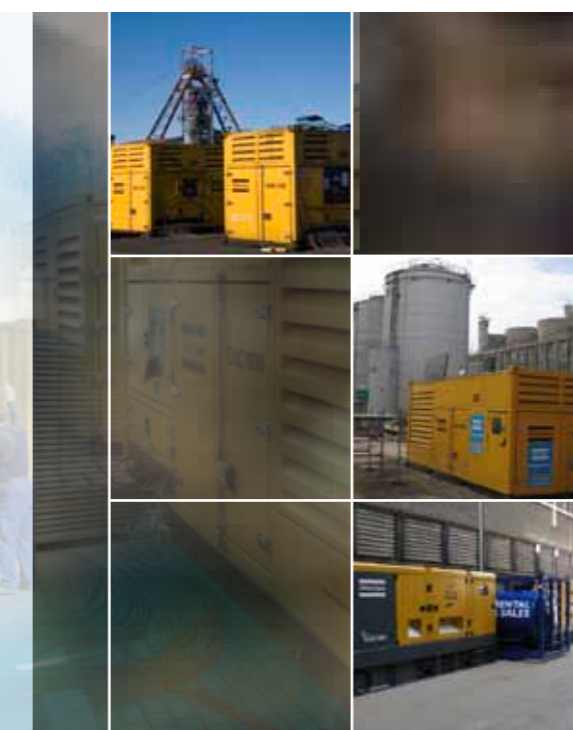

Tough Standards

The Specialty Rental Division has been granted triple certification to ISO 9001:2000, ISO 14001:2004 and OHSAS 18001 for Quality, Environmental and Occupational Health & Safety Management by Lloyd's Register Quality Assurance (LRQA). This triple certification demonstrates our commitment to the quality of our services, our care for the environmental impact of our operations and the health of our employees and customers.

Rental services for power generation

Atlas Copco Specialty Rental Australia Generator range

Whatever your business you need a reliable power supply. Whatever your power requirement, you need it 'now'. Atlas Copco Specialty Rental supplies the temporary power needs of companies around the world in a broad range of industries.

There are many reasons to rely on Atlas Copco Specialty Rental for your temporary power requirements. Immediate response and quality equipment sum up our service, allowing you to focus on your core business activities and eliminating the need to invest in extra equipment.

Thanks to our strategic network of rental depots and service centres, we can deliver the complete package of generators and accessories for both emergencies and planned projects.

We're your one stop shop for temporary power needs.

Atlas Copco Specialty Rental Australia delivers more than just electric power. We offer the quality and quantity you need, with special attention to safety, health and the environment.

All Atlas Copco Specialty Rental gensets produce low noise levels and, thanks to their electronic control systems, consume minimum diesel fuel in accordance with international noise and emission standards. Continuous productivity, even under difficult conditions, does not mean compromising performance or the environment.

Rental services

Atlas Copco Specialty Rental Australia provides both short and long term power generation solutions. Along with a fleet of standard and specialised equipment we have the skills and expertise to ensure optimal performance and uninterrupted supply for all your applications.

We are involved in each project from installation, to maintenance and functional control of our machines in order to guarantee uninterrupted service.

Power standards

Technical expertise and our reputation as a solutions provider sets Atlas Copco Specialty Rental apart. Continually improving and striving for new ideas and solutions to meet the needs of industry remains a priority. You can count on the latest, innovative Atlas Copco products, specially designed to deliver the power you need even under the toughest conditions.
