SMARTLINK

Data Monitoring Program

Imagine what it would mean to your business to always be one step ahead; to do away with all your production uncertainties; to actually learn from your activities.

Not only would you save precious time in being pro-active, you would certainly impact your bottom line too, not having to react when something happens... because nothing does.

That's exactly what Atlas Copco's **SMARTLINK** is all about: an easy-to-install, efficient-to-monitor, easily tailored compressor monitoring program. It offers your company a complete insight of your compressed air production. It helps to predict potential problems – and thus anticipate them; it shows how and where the production can be optimized and energy can be saved.

The Risks of Reactivity

Service of compressors and compressor rooms were until now mainly re-active: an unforeseen event requiring an immediate intervention from a service technician.

As you don't exactly know when a compressor is due for maintenance, you're continuously taking a risk: when compressors are not maintained properly

in time, their energy consumption is not as efficient as it could be. Worst case scenario: a compressor that is not serviced carefully risks to break down.

With **SMARTLINK** installed this is no longer the case: from now on, you can monitor your productivity 24/7.

More than just a watchful eye

SMARTLINK gathers, compares and analyzes data on the fly. When needed, it sends out warnings in time, allowing you to carefully plan and prepare service interventions. As a result, service efficiency increases, precious time is gained and money is saved.

Knowing exactly how your system is running, also makes identifying ways for improvement much easier. **SMARTLINK** provides you with the transparency you need to intelligently assess system performance. Based on the results, you can then easily determine a course of action to improve system usage and limit energy consumption costs.

Insightful information, tailored to your needs

SMARTLINK is as flexible and informative as you want it to be. Choose from the 3 levels which solution best fits your company.

SMARTLINK SERVICE

Rule out all uncertainties. With **SMARTLINK** Service installed on your compressors, scheduling maintenance visits becomes as simple and easy as it should be; your service log book is always just one click away and your online link with Atlas Copco allows you to request and receive quotes for spare parts or additional services very fast.

SMARTLINK UPTIME

Keep your compressors up and running. By e-mail and/or text, you receive all relevant machine indications (warnings and shutdowns) in advance. Based on this information, you can then take all necessary actions and measures to avoid the risk of a breakdown.

SMARTLINK ENERGY

Safeguard the performance of your equipment. With **SMARTLINK** Energy, Atlas Copco enables you to continuously monitor and analyze the energy efficiency of your compressor room. You decide on the performance indicators, you define the benchmarks. **SMARTLINK** analyzes and reports. You can make accurate and immediate improvements when needed. The results can be used for energy monitoring according to ISO50001.
