

# Pressure Sensor

Atlas Copco Optimization

## Characteristics

- Detect issues in your compressed air distribution to prevent costly production stops.
- Monitor system efficiency to reduce energy waste and lower operating costs.
- Trigger real-time alerts and actionable recommendations to keep your system optimized.
- Embedded connectivity enables seamless integration and continuous monitoring.
- Designed for indoor or sheltered environments.

## Technical Specifications

Power supply	AA Battery – 4 Units
Operating Temperature	-10°C to +60°C
Calibration (Factory Calibrated)	max drift of +/- 30 mbar/year
Accuracy	0-16 bar : +/- 100 mbar (at temp. range 0-40°C)
Transmission	Once per second
Threaded connection	Male ISO ½” or NPT ½”
Range	150 m Radius
Power supply	AA Battery – 4 Units
