Has your compressor got PACE?

PACE technology redefines the relationship between pressure and flow. A compressor with PACE technology can cover the application needs of, on average, three fixed pressure compressors.

- Toggle between the presets in a simple click.
- Custom pressure can be set in 3 simple clicks.
- Pressure can be adjusted in increments of 0.1 bar.

Intuitive user operation:

- You pick the pressure...
- Your application’s needs dictate the flow...
- The PACE controller locks in, and regulates, the perfect combination!

Applications include:
- 7 bar: Handheld tools
- 8.6 to 10 bar: Abrasive blasting
- 7 to 12 bar: Shotcrete applications
- 12 to 14 bar: Cable blowing and drilling

What PACE is:
- An electronic regulation system programmed via a digital controller.
- A system that offers the widest operating pressure range within a single compressor. Allowing multiple pressure and flow combinations.
- A simple to use system with guaranteed accuracy and ensuring safety. Guaranteeing the long-term performance of the compressor.
- A system that gives you the versatility of three machines in one package.

What PACE is NOT:
- A linear system where adjusting the pressure dictates the flow.
- A regulation valve where you use guess work to manually adjust the settings.

PACE technology gives you higher utilisation, more versatility, improved efficiency savings and a higher return on investment!
