The ETP series offers four models. All are lightweight, highly portable, self-priming pumps. We offer three models which are gasoline driven. The ETP 100D model is also available with diesel power. This range of versatile pumps can be used across many applications and are great for emergency use and non-planned events.

The balance of portability and power means you can easily transport them to your application site. The rugged, high performance features ensure performance – even in the harshest of environments.

Key Features

- Portable and lightweight
- Easy maintenance – no special tools needed
- Solids handling capability
- Low fuel consumption
- Self-priming (wet prime) with a suction lift of 7,5m
- Trolley version available (ETP 100D)
