A RELIABLE SOLUTION that is connected, flexible and built on state of the art technology. With a wide range of tools, accessories and services, Atlas Copco supports the vision of Industry 4.0. Experience the freedom of battery tools – and the quality assurance you gain from knowledge and control.

We call it – Smart Connected Assembly.

Virtual Stations. Stay connected while experiencing the advantage of cordless freedom. With flexible re-balancing and quick adaptations you have a productive solution. Virtual stations make product introductions quick and easy.

Full System Integration. Work with a platform that is easily integrated to any upper system through customer protocols, as well as open protocols. The Power Focus 6000 offers full integration – all in one, total intelligence.

Multitool concept. Connect several tools to one controller – and save money on installation and maintenance. Experience the benefits of a diminished, smart connected solution – working for your specific needs.

Total solutions provider. Connect your smart and wireless tools, devices and accessories through one smart controller. The Power Focus 6000 offers a total solution to your assembly needs, making Smart Factory a reality.

Virtual Stations. Stay connected while experiencing the advantage of cordless freedom. With flexible re-balancing and quick adaptations you have a productive solution. Virtual stations make product introductions quick and easy.

Complete connectivity. Enjoy the improved coverage with 2,4 and 5,0 Ghz gained by a new external antenna. The Power Focus 6000 offers two ways of staying connected: infrastructure or pairing mode.

Maximized uptime. An embedded buffer battery maintains communication while the main battery is being replaced. This simply makes your tool ready, at all times.

Full error proofing. Gain full traceability with the help of the integrated barcode scanner. You will have a process which improves productivity and saves costs by avoiding additional hand held scan devices.

Focus on Ergonomics. Decrease operator fatigue and invest in a good ergonomic experience. The STBx4 is designed with a well balanced tool on the grip and the best performance ratio weight, speed and torque.

Robust and accurate. When it comes to safety critical wireless tools, our experience keeps us in the position as market leaders. With more than 10 years in the market – this robust tool has a well proven history in assembly lines around the world.

Full System Interaction. With eHMI you have more than just results – gaining full process overview and insights on for instance events, programs and Batch Sequence. And the possibility to select a repair program – system interaction anytime, anywhere.

Maximized uptime. An embedded buffer battery maintains communication while the main battery is being replaced. This simply makes your tool ready, at all times.

Full System Integration. Work with a platform that is easily integrated to any upper system through customer protocols, as well as open protocols. The Power Focus 6000 offers full integration – all in one, total intelligence.
Tensor STB34/64 is a part of Atlas Copco Smart Connected Assembly - using all the benefits of Industry 4.0 to make Smart Factory a reality.

Increased uptime: Keeps network connectivity during battery change while ToolCover service increases uptime.

Reduction in defects: eHMI offers direct feedback with possibility of repair on the station.

Improved productivity: Integrated barcode reader with automation and cordless freedom increases productivity.

Human factors: Operator feedback directly on tool display. No restriction or trip hazards due to cables.

New Product Introduction: Simple to re-balance line or introduce new assembly operation thanks to Virtual Stations.

Ensure the optimal performance of the Smart Factory day-on-end with the right start-up "Easy Start" throughout the lifetime with the best suited "ToolCover" service solution.
