The EBB26 is a drill designed to enhance its users. A drill engineered to enable operators to move faster, make fewer errors, perform better and ultimately achieve more.
Made for people to make more

**Boosting Operator Productivity in Drilling**

In airframe assembly, 35% of holes are drilled using handheld tools. Yet, handheld drilling accounts for up to 65% of assembly cost, 85% of quality issues, and 80% of lost time due to injury.*

There’s an opportunity to improve efficiency and increase total aerospace output by addressing the root cause of this problem: the productivity of aerospace operators.

To do this, we need to look at human productivity in a new light. Instead of rejecting or attempting to eliminate the human factor, we need to embrace it. That’s why we created the EBB26 – a drill designed to enhance its users. Made for people to make more.

* Aerospace industry expert

**Going Electric**

The EBB26 is our first electric handheld drill. It is designed to transform assembly line flow. It is engineered to enable operators to move faster, make fewer errors, perform better and ultimately achieve more.

**Designed to Improve**

- **Operator Mobility**
  - CORDLESS
  - Let operators spend more time drilling.

- **Operator Accuracy**
  - USER FEEDBACK
  - Enable operators to make fewer mistakes.

- **Operator Performance**
  - ERGONOMIC DESIGN
  - Empower operators to do more with less.
Features

**OPERATOR MOBILITY**
- CORDLESS & BATTERY-DRIVEN
- ONE TOOL, MULTIPLE SPEEDS
- SMALL SIZE & SHORT HANDLE

**OPERATOR ACCURACY**
- CONSTANT SPEED & 2-STEP TRIGGER
- CUTTER USAGE
- A MORE PRECISE CHUCK

**OPERATOR PERFORMANCE**
- LIGHTWEIGHT
- REDUCED NOISE
- TOOL OPTIMIZED FOR DRILLING
