The Selector 6 Series is all about mobility. You connect to the network wirelessly or via Ethernet. Selector 6 Series can be powered by battery, Power over Ethernet or with a stationary power supply. Giving you full freedom of choice to fit your exact need.

Virtual Stations and Battery Tools will boost your productivity like never before!

The Selector 6 Series is the perfect addition to your mobile rework stations.

Sustainable Productivity

www.atlascopco.com
Error proofing with wireless freedom

Improve your productivity and achieve a reduction in defects and energy use with superior flexibility and error proofing of your tightening process.

Selector 6 Series is designed to give you a perfect Error Proofing-solution with outstanding mobility and connectivity. It will improve your productivity and operator ergonomics with increased uptime, reduction in energy consumption and defects as well as ease of installation. Connect the Selector 6 Series wirelessly (2.4 & 5Ghz) to your factory network. Using the same battery as your Atlas Copco tools, it gives outstanding operating time, and thanks to its commonality reduced inventories and simple battery management. The built-in buffer battery will assure that you stay connected during battery exchange for minimum downtime.

Choose your Selector 6 Series in the model you prefer: Stationary (S) or Mobile (M). It is flexible in its choice regardless – just the freedom to Daisy Chain up to 32 positions. All models in the Selector 6 Series can be powered by Power over Ethernet.

Features
- Wireless module (2.4 & 5Ghz)
- Built in buffer battery, change battery without losing network
- IP65 class rated
- Clear LED lights for operator guidance
- Network & Battery status indicators
- RBU – Store your network configurations for quick swaps.
- Service port – Network settings through web interface. Setup is easily done in Tools Talk 2 or directly on a Power Focus 6000.
- Battery with superior battery life and full commonality with other tools
- DIN rail mounting options
- Daisy chain possibilities and 4 x Digital out

Selector 6 is a key part of Atlas Copco Smart Connected Assembly - supporting Industry 4.0 to make Smart Factory a reality.

Increased Uptime: Fast to install and with a buffer battery keeping the connection during battery change. With a RBU carrying all settings, allowing fast swap if selector is down.

Reduction in Defects: Selector 6 Series provides visual feedback to the operator, decreasing costs related to scrapping and rework.

Improved Productivity: By bringing the selector closer to application unnecessary operator movement is reduced.

Human Interaction: The Selector is easily installed and placed wherever needed. Wireless communication and battery power supply enables cable free installations. Easy installation and mobility in your hand.

New Product Introduction: The value of guiding the operator is key when introducing new models or having a big product mix. PoE and wireless connectivity greatly simplifies installation and rebalancing.

Reduction in Energy Use: Selector 6 has integrated Power consumption management.

3D print socket holders – if you need it, we print it! We offer custom made holders. Using a CAD drawing of your socket or attachment, we manufacture your custom made holder, with maximum durability and a perfect fit.
