

Calibration

Tool and quality assurance calibration services

Secure your quality and reduce defects

Tools and measurement equipment lose accuracy over time, and calibration is the first important step toward maintaining their precision and performance. We offer both tool calibration and quality assurance calibration services.

- Calibration process performed by certified technicians using traceable reference equipment
- Atlas Copco calibration certificates following relevant standards, retrievable for at least 10 years
- Both lab and on-site calibration services, including adjustment where applicable
- Functional test before calibration
- Calibration due-date reminder
- Traceability assurance of the production process
- Minimized rework, warranty, and recall costs
- Reduced risk of liability claims and reputation damages

Calibration services

Accredited quality assurance calibration

As an ISO 17025 accredited provider, we are able to offer accredited lab and on-site calibration services using reliable measurement equipment.

Atlas Copco tool calibration

We provide professional torque, angle and force calibrations performed by certified technicians, fulfilling global and national requirements.

Best if combined with

EasyStart

Right from the start

Improve the value and productivity of your tools and software. Our installation services guarantee quality right from the start. EasyStart includes calibration, operator training, and line audit.

ToolCover

Take care of your tools

Get maximum value and longevity from your tools with our preventive maintenance plans. Our modular product line is customizable to meet your unique needs. Calibration is included in ToolCover contracts.

ALTURE Optimize

Proactively optimize processes

A data-driven solution that proactively monitors your production quality. ALTURE Optimize provides real-time information and recommendations via mobile app push notifications, right in the palm of your hand.
