

Water for All

We believe that everyone should have access to fresh water. That's why our employees started the Water for All initiative. Every crown (or euro) donated by them is doubled by the company.

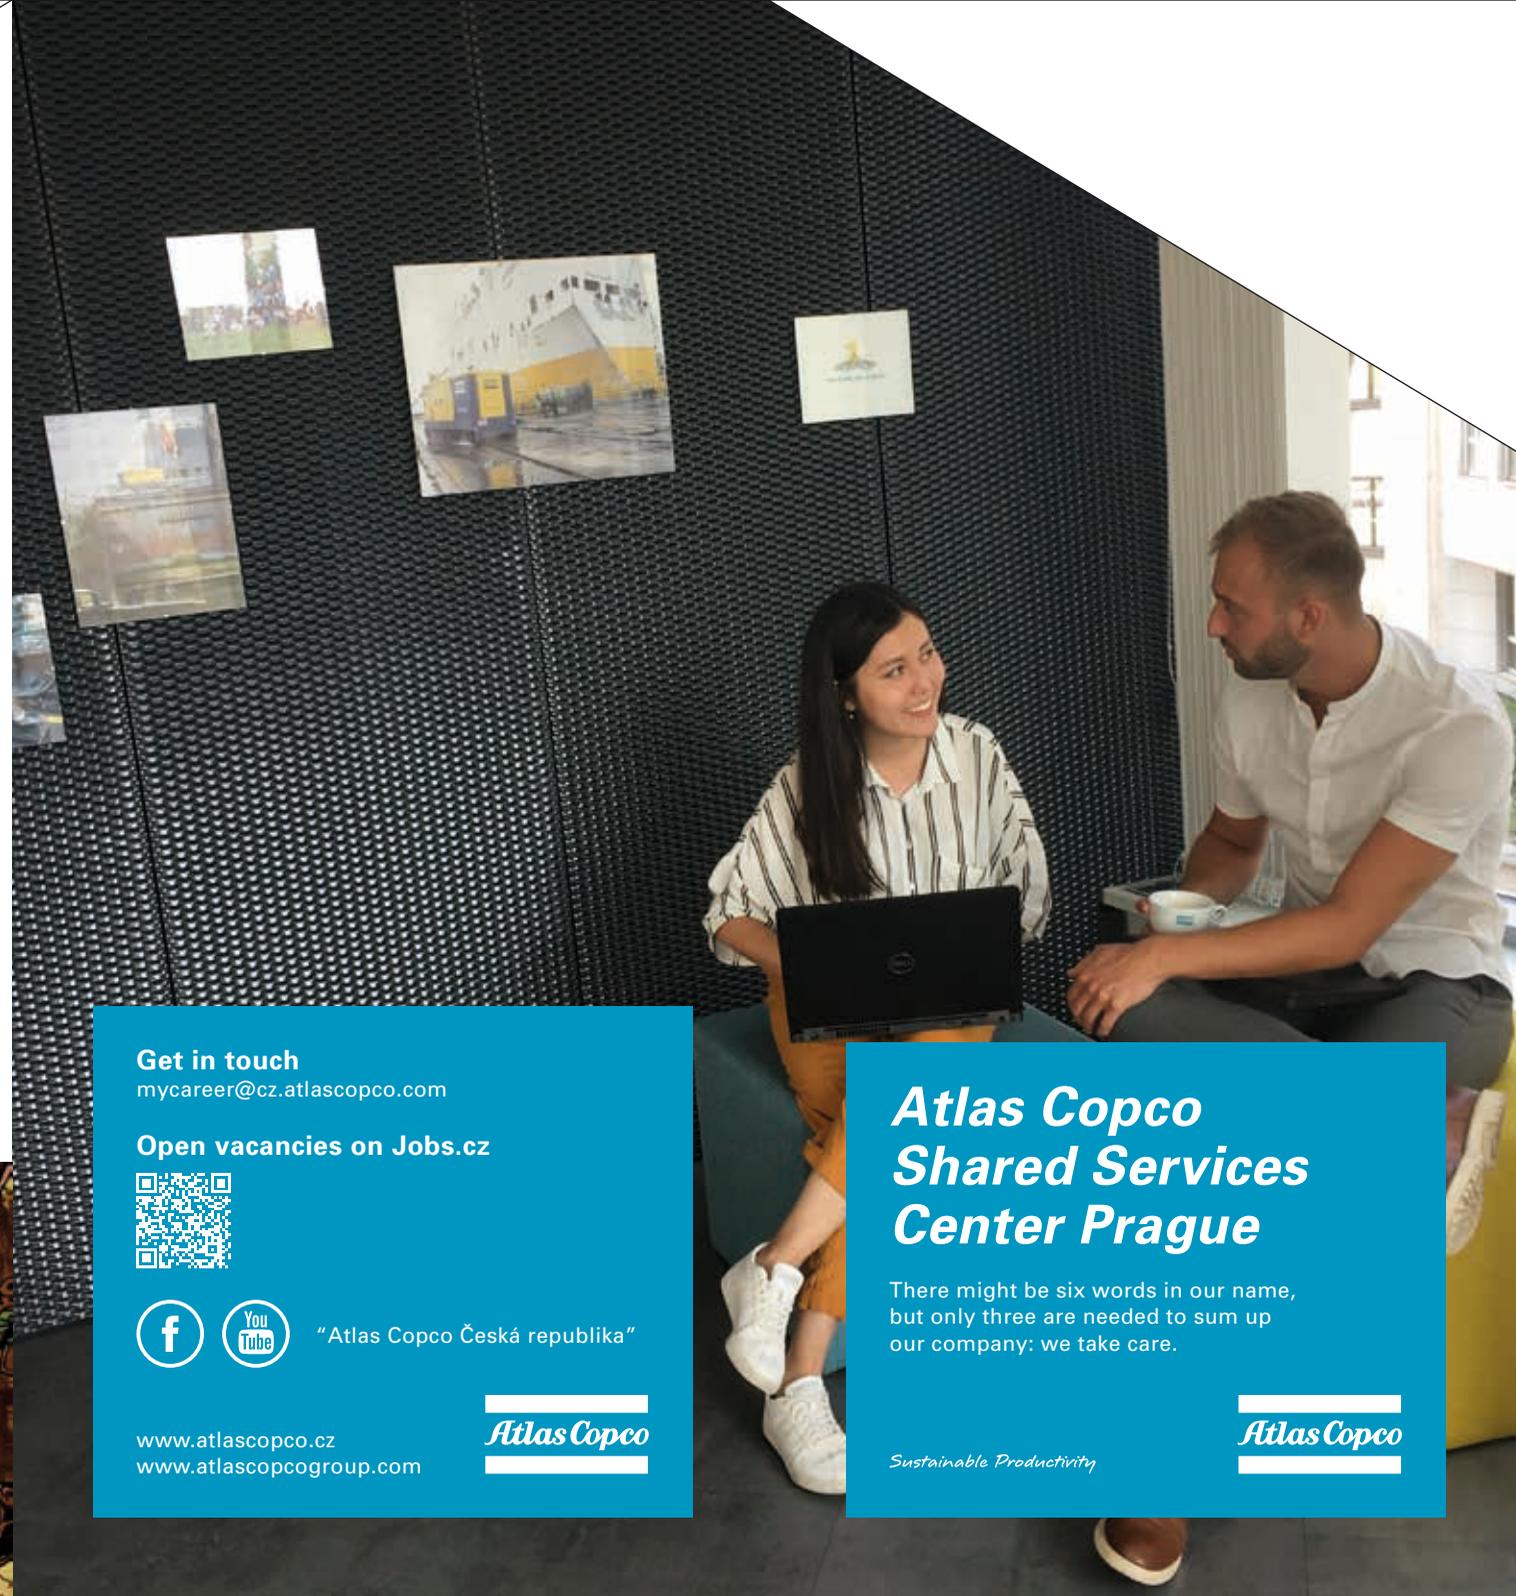

Fair company

We were the first corporation to become part of the "Slušná firma". It is a Czech project that gathers companies respectful to their employees, the community and the environment.

Atlascopcosaurus

Not every company has a dinosaur named after it. We do. Just Google it.
