**Please note:** Our controllers and the software are designed to operate with no direct exposure to the public internet in an industrial production environment. As such, it is unlikely that they would be an entry-point for an attack, unless used outside the intended environment.

Atlas Copco cannot give any guarantees for third party software that is installed on the computers by our customers in the system (e.g. to interface with additional hardware or customer IT, anti-virus-products installed by the customer etc.). This statement only applies to Atlas Copco's Industrial Assembly Solutions software.
