100% oil-free air compressors

Only ZERO is 100%

Air purity is critical for applications where even the tiniest drop of oil, or air contaminated with oil, can cause product spoilage, product recall or damage production equipment and even environmental damage. Atlas Copco Rental Class Zero air compressors cover the stringent quality requirements.

The Atlas Copco Rental oil-free fleet is ISO 8573-1 CLASS 0 (2010) certified and guarantees flexibility, support, and 100% peace of mind. Even when you only temporarily rely on our equipment.

When to rent?

Every industry and process is different but they share the need for reliable utilities likes electricity, water and compressed air. When it comes to compressed air, Atlas Copco Rental can cover every need that could arise; in every one of those industries.

- Emergency situation or breakdown
- Temporary standstill or maintenance
- Continuity during construction work
- Need for expansion
- Seasonal activity...

For each of these typical needs, our experts will design the optimal configuration, with carefully selected equipment from its broad range of compressors, generators, nitrogen units and matching accessories.

Why rent?

- **Keep production going:** If equipment breaks down, we will deal with it quickly and efficiently to ensure minimum interruptions in your process.
- **Maintain full flexibility at all times:** Get the equipment you need, when you need it, and keep your equipment inventory to a minimum.
- **Do not tie up your capital:** and use it for other, potentially more profitable, ventures.
- **Control your costs:** you have just one monthly invoice.
- **Avoid costly maintenance:** We take care of the maintenance, so you won't need a repair shop, spare parts inventory or mechanics.

These are only few of the good reasons why you should look into renting!

Why Atlas Copco Rental?

The industry leader

For short or long term rental of high quality air, nitrogen or reliable power and state-of-the-art accessories, we are able to meet your needs around the clock: **it's our business to keep your business running.**

A global player with local presence

With over 130 locations worldwide, we have the experience, know-how and equipment to handle large and small projects, whether in response to an emergency, for planned backup or temporary replacement projects.

The size of our fleet as well as our very short response times guarantee the continuity of your production, no matter what happens we can come up with tailored solutions thanks to our efficient and reliable equipment, and the recognized quality of our services.

Oil-free air compressors - diesel and electric

Our **electric- or diesel-driven 100% oil-free compressors** are ideal for critical applications where air quality is paramount. Even the smallest amount of oil contamination is hazardous and results in an inferior product, as well as long-term damage to your reputation. When faced with a **breakdown or planned contingency**, you can rely on our equipment to meet your standards of air quality. That way, when faced with the unexpected, your product and reputation can be safeguarded. Even when you have to rely on a temporary solution. Our Class Zero equipment is ISO-certified – an industry first.

Because electric-driven solutions are virtually plug-and-play, commissioning time is limited, and that, in turn, increases efficiency.

However, a reliable source of energy is not always available. That is why Atlas Copco Rental continues to invest in our **diesel-driven fleet** and makes sure the equipment is **efficient and compliant with the strictest legislation**. Like **Stage V**, the new standard in diesel-driven equipment.

Through growing public concern for air quality and health, electric-driven equipment is receiving ever more attention. It not only eliminates harmful emissions, but also significantly reduces noise levels. Going electric does not mean sacrificing working parameters or expectation. Electric-driven equipment is capable of reaching the **same flow and pressure** as its diesel-driven counterparts.
