THE IDEAL SMALL BUSINESS COMPRESSOR

Atlas Copco compressors are legendary for their reliability and efficiency. That is why our G-series has long been the preferred air solution for small and medium sized businesses. The GX 2-7 EP and the G 7-15 simply check all the boxes:

- Quiet
- Efficient
- Powerful
- Reliable

THE NEW G-SERIES

The latest-generation G-series comes with Atlas Copco’s powerful rotary screw element and an advanced electronic controller on the G 7-15 to go above and beyond the call of duty.

BUILT-IN RELIABILITY

- Atlas Copco’s patented rotary screw element allows for a 100% duty cycle.
- The complete unit is designed to operate at ambient temperatures of up to 46 °C/115 °F.

EASY INSTALLATION

- Available in multiple configurations – including floor or tank mounted and with or without integrated dryer.
- Extremely small footprint and cooling air discharge from the top allow for placement against a wall or even in a corner.

ADVANCED MONITORING

The G 7-15’s new BASE controller offers advanced monitoring and control:

- Icon-based display, pressure settings, temperature reading.
- Running hours/hours working @ load.
- Service warnings.
- Outlet pressure setting directly on the controller.
- Pressure and element outlet temperature reading.

ROBUST AND EFFICIENT COMPRESSION ELEMENT

Atlas Copco’s trusted rotary screw element offers an increased free air delivery by up to 3% compared to the previous models.

ATLAS COPCO, PREMIUM QUALITY SINCE 1873

Atlas Copco was founded in 1873 and is based in Stockholm, Sweden. We have been a global leader in high-quality compressed air technology for more than a century and continue to raise the bar with innovative products.

ATLAS COPCO G-SERIES COMPRESSIONS - 3
ZERO HASSLE, ZERO WORRIES COMPRESSORS

G 7-15

INDUSTRY-LEADING PERFORMANCE

• Thanks to load/no load control, the compressor controller switches automatically to the optimum control mode for high, low and intermittent air consumption.
• Best-in-class performance, total reliability and low power consumption.

GX 2-7 EP

COMPACT AND EFFICIENT

• Compared to piston compressors, the GX offers reduced energy consumption and high efficiency.
• The rotary screw technology minimizes vibrations for silent operation at the lowest initial investment.
• The standard start/stop control on the GX 2-5 EP ensures the compressor only consumes power when compressed air is needed. The GX 7 EP is equipped with energy efficient load/no load control.
QUALITY AIR PERFORMANCE

Untreated compressed air contains moisture, aerosols and dirt particles that can damage your system and contaminate your end product. Atlas Copco’s G-series compressors provide the clean, dry air that improves reliability, avoids costly downtime and safeguards your products.

FULL FEATURE WITH BUILT-IN DRYER

The Full Feature version comes with a built-in refrigerant air dryer. It cools the compressed air and removes any moisture before it can enter your compressed air network. This prevents rust in your refrigerant air dryer. It cools the compressed air and avoids damage to your air tools.

TYPICAL FLOW CHART FOR THE G 7-15 EL FF

A CHOICE OF FILTERS

To ensure your compressed air meets the quality air needs of a wide range of applications, different grade PD/DD air filters can be selected.

OPTIONS

Available options

- Integrated aftercooler
- Water separator (shipped loose)
- Timer water drain on water separator (shipped boxed)
- Timer drain on air receiver (tank mounted only)
- Electronic no loss water drain on water separator (shipped boxed)
- Electronic no loss water drain on air receiver (500 l/120 gal tank mounted only)
- Integrated DD filter kit
- Integrated high performance PD filter kit
- 500 l/120 gal air receiver (tank mounted only)

Standard - Optional - Not available
