Oil-injected rotary screw compressors

GA 7-37 VSD+ (7-37 kW/10-50 hp)
A new standard in compressed air performance and efficiency

Atlas Copco’s GA 7-37 VSD+ is a true game changer for your operational environment. It reduces energy consumption by on average 50% and assures performance even in the harshest conditions. The GA 7-37 VSD+ comes with Variable Speed Drive as standard, our in-house designed iPM motor technology, and advanced connectivity. The result is a compact compressor that fits in the smallest room and that sets a new standard in efficiency and performance for years to come.

Innovative

Atlas Copco has revolutionized compressor build and performance. Instead of the normal space-taking horizontal design, the new GA 7-37 VSD+ has an upright, compact layout. This saves valuable floor and work space, eases maintenance access, and reduces the total cost of ownership for all customers.

Efficient

- Reduced energy consumption by 50% on average compared to the current idling models.
- Free Air Delivery (FAD) increase of up to 12%.

Meeting and exceeding efficiency benchmarks:

- The iPM motor of the GA 7-37 VSD+ equals IES standards.
- The inverter and iPM motor exceed IES2 (EN 50598) requirements for power drive efficiency.

Reliable

- Low maintenance: fewer components, increased uptime.
- Based on the unique combination of proven technologies and existing components, optimally brought together by Atlas Copco’s experience and know-how.

Smart

- Easy monitoring and maintenance thanks to the Elektronikon Touch controller.
- Maintenance notifications and machine status are available via SMARTLINK e-mail or text messages.
- Customized reports on the energy performance of your machine, in compliance with ISO 50001.
Inside the innovative GA 7-37 VSD+

**I5**

Meeting and exceeding efficiency benchmarks:
- The IPM motor of the GA 7-37 VSD+ equals IE5 standards.
- Inverter and IPM motor exceed IE52 (EN 50598) requirements for power drive efficiency.

**1**

Interior Permanent Magnet (IPM) motor
- Compact, customized design for optimal cooling by oil.
- Designed in-house in Belgium.
- IP66 protection rating.
- No cooling air flow required.
- Oil-lubricated motor bearing: no (re)greasing, increased uptime.

**2**

Element
- Made by Atlas Copco.
- Robust and silent.

**3**

Direct drive
- Vertical design, fewer parts.
- Oil-cooled, pressure-tight.
- No gears or belts, no shaft seal.
- Compact: footprint down 60%.

**4**

Innovative fan
- Based on the newest technologies.
- In compliance with ERP2015 efficiency.
- Low noise levels.

**5**

Robust oil filter/separator
- Integrated bypass valve with the oil filter.
- Easy maintenance.

**6**

Electronic no-loss water drain
- Included as standard.
- Efficient removal of condensate without loss of compressed air.

**7**

Elektronikon® Touch controller
- High-tech controller with warning indications, compressor shut-down and maintenance scheduling.
- Easy to use and designed to perform in the toughest conditions.
- Standard SMARTLINK remote monitoring to maximize air system performance and energy savings.
- Optional multiple compressor control (2, 4 or 6 compressors).

**8**

Sentinel valve
- No inlet arrestor.
- No blow-off or pressure drop losses.
- Maintenance-free.

**9**

VSD+ cubicle
- VSD+ is superior to idling machines.
- Electrical components remain cool, enhancing their lifetime.
- Dedicated drive for IPM technology motors.
- 5% DC choke as standard.
- Heat dissipation of inverter in separate compartment.
Atlas Copco’s GA Variable Speed Drive+ (VSD+) technology closely matches the air demand by automatically adjusting the motor speed. Combined with the innovative design of the iPM (Permanent Magnet) motor, this results in average energy savings of 50% and an average reduction of 37% in the lifecycle cost of a compressor.

**Why Atlas Copco Variable Speed Drive+ technology?**
- On average 50% energy savings with an extensive flow range (20-100%).
- Integrated Elektronikon® Touch controller controls the motor speed and high-efficiency frequency inverter.
- No wasted idling times or blow-off losses during operation.
- Compressor can start/stop under full system pressure without the need to unload.
- Eliminates peak current penalty during start-up.
- Minimizes system leakage due to a lower system pressure.

*Compared to fixed speed compressors, based on measurement performed by an independent energy audit agency.*

In almost every production environment, air demand fluctuates depending on different factors such as the time of the day, week or even month. Extensive measurements and studies of compressed air demand profiles show that many compressors have substantial variations in air demand.

**VSD+ for 50% average energy savings**

**GA Fixed Speed**
- Energy: 65%
- Investment: 10%
- Maintenance: 25%

**GA VSD+**
- Energy: 35%
- Investment: 10%
- Maintenance: 55%
**Advanced monitoring, control & connectivity**

Whether you call it Industry 4.0 or the Internet of Things (IoT), interconnectivity is the future. The GA 7-37 VSD+ comes fully prepared. Its advanced monitoring, control and connectivity features allow you to optimize compressor performance, resources, efficiency and productivity.

**CONNECT SMARTLINK*: Data Monitoring Program**

- Remote monitoring that helps you optimize your compressed air system and save energy and costs.
- Provides a complete insight in your compressed air network.
- Anticipates potential problems by warning you upfront.

* Please contact your local sales representative for more information.

**State-of-the-art Elektronikon® Touch controller**

- Improved user-friendliness: 4.3-inch high-definition color display with clear pictograms and service indicator.
- Built-in SMARTLINK online monitoring.
- Increased reliability: new, user-friendly, multilingual user interface and durable touch screen.

**Key features:**

- Automatic restart after voltage failure.
- Internet-based compressor visualization using a simple Ethernet connection.
- Dual Pressure Set Point.
- More flexibility: four different week schedules that can be programmed for a period of 10 consecutive weeks.
- On-screen Delayed Second Stop function and VSD+ savings indication.
- Graphical service plan indication.
- Remote control and connectivity functions.
- Control up to 6 compressors by installing the optional equalizer central controller software.

**Excellence in integrated air quality**

Untreated compressed air contains moisture and aerosols which increase the risk of corrosion and compressed air system leaks. This can result in a damaged air system and contaminated end products. Maintenance costs can far exceed air treatment costs. The GA 7-37 VSD+ provides the clean, dry air that improves your system’s reliability, avoids costly downtime and production delays, and safeguards the quality of your products.

**On average 50% energy savings with newly designed integrated dryers**

- Pressure dewpoint of 3°C/37.4°F (100% relative humidity at 20°C/68°F).
- Heat exchanger cross-flow technology with low pressure drop.
- Zero waste of compressed air thanks to no-loss condensate drain.
- Reduced operating costs.
- Environmentally-friendly characteristics: zero ozone depletion.
- Global warming potential has been lowered by an average of 50% by reducing the amount of refrigerant in the new dryer.

**Meet your specific requirements**

Thanks to its integrated dryer, the Atlas Copco GA 7-37 VSD+ offers the right air quality for your application.

**Compressed air purity classification ISO 8573-1:2010**
