

Introducing Tensor STR 31 and STR 61

A new generation of tightening tools is here!

We are proud to introduce the new range of Tensor STR 31 and STR 61 tools. Atlas Copco's unique Tensor motors give the Tensor range outstanding speeds and, thus, help you achieve lower cycle times in your operation. Exceptional ergonomics in terms of balance, grip and low weight make the tools a favorite of the operators and increase individual productivity. The new generation of Tensor tools, Tensor STR, take ergonomics and productivity to a new level.

- ✓ Designed for safety critical or quality critical applications (+/- 5% accuracy)
- ✓ Highest accuracy available with ETT STR model (+/- 2.5% accuracy)
- ✓ Faster speeds than comparable ST models
- ✓ Stronger motor bearing houses and redesigned motor for more power
- ✓ Up to 20% improved heat dissipation over previous generation tools
- ✓ Superior power to weight ratio
- ✓ Available torque range with Tensor STR 31 and 61 is from 1-200 Nm
- ✓ 360° visible LEDs
- ✓ Compatible with current generation tightening controller Power Focus 4000 when running software W10.10 or higher
- ✓ Modularity in spares and accessories with Tensor ST generation tools
- ✓ TurboTight® when used with the next generation tightening controller, Power Focus 6000
- ✓ TrueAngle® when used with the next generation tightening controller, Power Focus 6000

Features

- A** All Tensor STR tools can be equipped with special and customized front parts.
- B** Tensor STR tools are designed to withstand even the most challenging environments. Its IP54 classification guarantees dust and water splashing protection.
- C** The Tensor STR offers dual accessories connectivity for scanners, headlamps etc.**
- D** An integrated loudspeaker gives feedback to operators about tightening results. Assembly instructions can also be used.
- E** Tensor STR tools can be equipped with two different HMI's to improve feedback and interaction with the operator.**
- F** Reverse ring.
- G** An improved trigger with a better tactile feeling.
- H** A redesigned grip delivers great operator comfort.
- I** EHMI Module**
- J** Barcode Scanner.

** When used with the next generation tightening controller, Power Focus 6000
