

The Atlas Copco logo is centered within a white rectangular box, which is itself set against a teal background. The logo consists of the brand name "Atlas Copco" in a white, italicized serif font.

# Why service?

Everything we do, we believe in improving your operations' safety and productivity while increasing your uptime and reducing your cost of ownership.

# Why service?

Each day thousands of workers in building, demolition and road construction across the world rely on Atlas Copco machines, products and services. Reliability is a key factor in your work; time is precious and deadlines are short. When conditions are tough and there is no time to waste, you need to trust your best partner to succeed! By offering continuous and top quality services, we deliver a clear value for our customers by improving the customer's bottom line and letting them focus on moving their business forward.

## Why our service?

It is more than fixing! We take care of your equipment throughout its entire lifecycle!

### Preventive maintenance

Maximize your productivity by keeping your machine in top condition through pro-active maintenance and generate more revenue. Our service plans are here to extend the life of your machine!

### Service repair

Top machine condition also translates into lower cost of ownership, lower equipment downtime, and lower fuel and repair costs. We have over 145 years of knowledge and expertise which leads to spot-on diagnosis.

### Training

Continuous training of our service technicians to maintain top competence levels

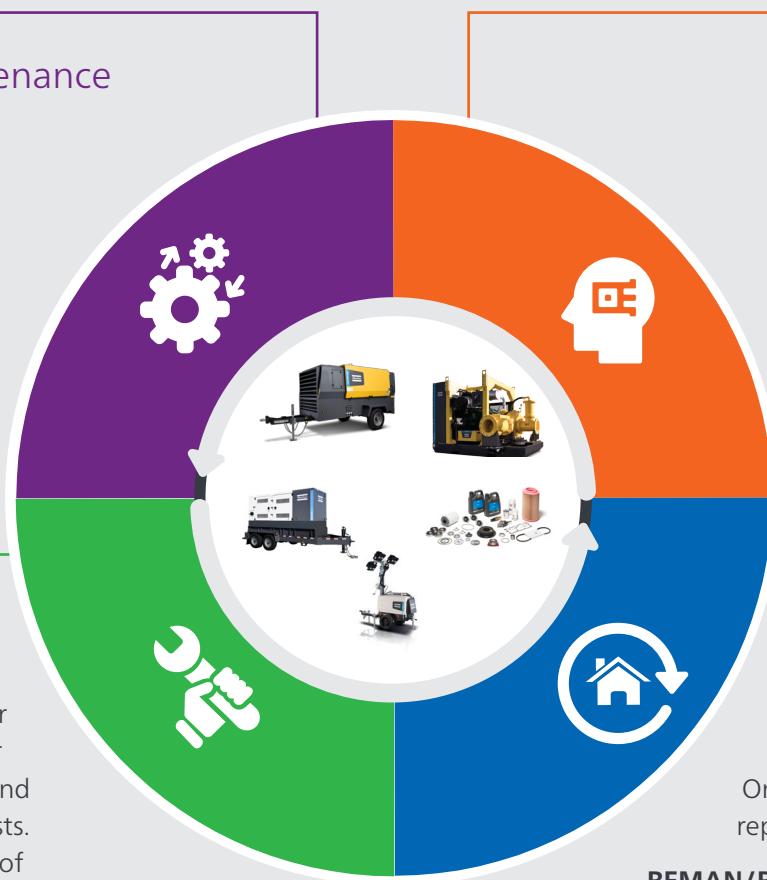

### Refurbishment

Operational excellence to provide another lease of life to your old machine. One stop shop for your unit repairs, including the engine

**REMAN/REFURB Atlas Copco Units**

**REMAN/REFURB Engines**

**REFURB Competitor Units**

# Preventive maintenance

Servicing a compressor regularly is the key to maximizing your investment, increasing productivity, and ultimately the bottom line of our customers. A well-maintained compressor which has maintained the service intervals and used genuine parts will keep the residual value much higher, with an overall lower life-cycle cost.

Our PLUS CARE field preventive maintenance service program will keep your machines at their peak performance.

## PLUS CARE benefits:

Improved production

Budget control

Minimized operational effort

Administrative savings

Eliminated investment peak

Increased site safety

# Service repair

We are a one-stop service shop when it comes to service maintenance. Our service technicians have the knowledge to perform a perfect diagnosis on your complete machine.

## All Atlas Copco units

Expertise to repair all Atlas Copco units in a quick and way.

## All engine sizes

Comprehensive technical knowledge to repair a range of engine brands with services that include the machining of major components such as blocks, heads, pistons and cylinders.

**John Deere | Perkins | Kubota  
Cummins | Kohler | Isuzu**

## Portable competitor units

Having broad technical knowledge on engines sets us apart from the competition and makes us your one-stop shop for the competitor unit repairs.

- Portable Compressors
- Portable Generators
- Diesel Pumps

# Refurbishment program

We have the top level of competence to provide your unit a new lease of life and a wide spread of different refurbishment offers tailor-made to your needs including the competitor units and the engines.
