

Atlas Copco

Rental –
Sunbelt Rentals

Your full fleet range in air compressors and submersible pumps

Atlas Copco Power Technique has been a partner with Sunbelt Rentals for over 10 years. As your trusted rental partner, we're here to deliver on the best technology, products, and parts and service for your business.

Our full air compressor line brings innovative units that cover a wide set of applications. From handheld construction jobs, to oil drilling and mining--we've got the air compressor for any jobsite. We've also got the handheld pneumatic, hydraulic, and gas powered tools for the mission. We've also introduced our new E-Air line--an environmentally friendly and operational choice for specific applications like confined spaces.

The Atlas Copco QAS generator line gives you large generator options from 250 - 625kVA.

Each of the different lines helps you to complete the full portfolio needed for any application.

Small, medium, large, and specialty air compressors

The Atlas Copco compressor range combines small, medium, large, and specialty air to cover a wide variety of applications and jobsites. From our new XAS 188, to our XAS 1800 and beyond, our compressors bring world-class innovation to the market. We listen to our customers and users, to make sure each component is manufactured to get the job done.

Handheld pneumatic, gas, and hydraulic tools

At Atlas Copco, we know the tools of the trade when it comes to designing construction equipment. Ergonomic, easy to handle and reliable, they will be your best friend for heavy-duty construction work.

Always the right tool for the job

Pneumatic tools:

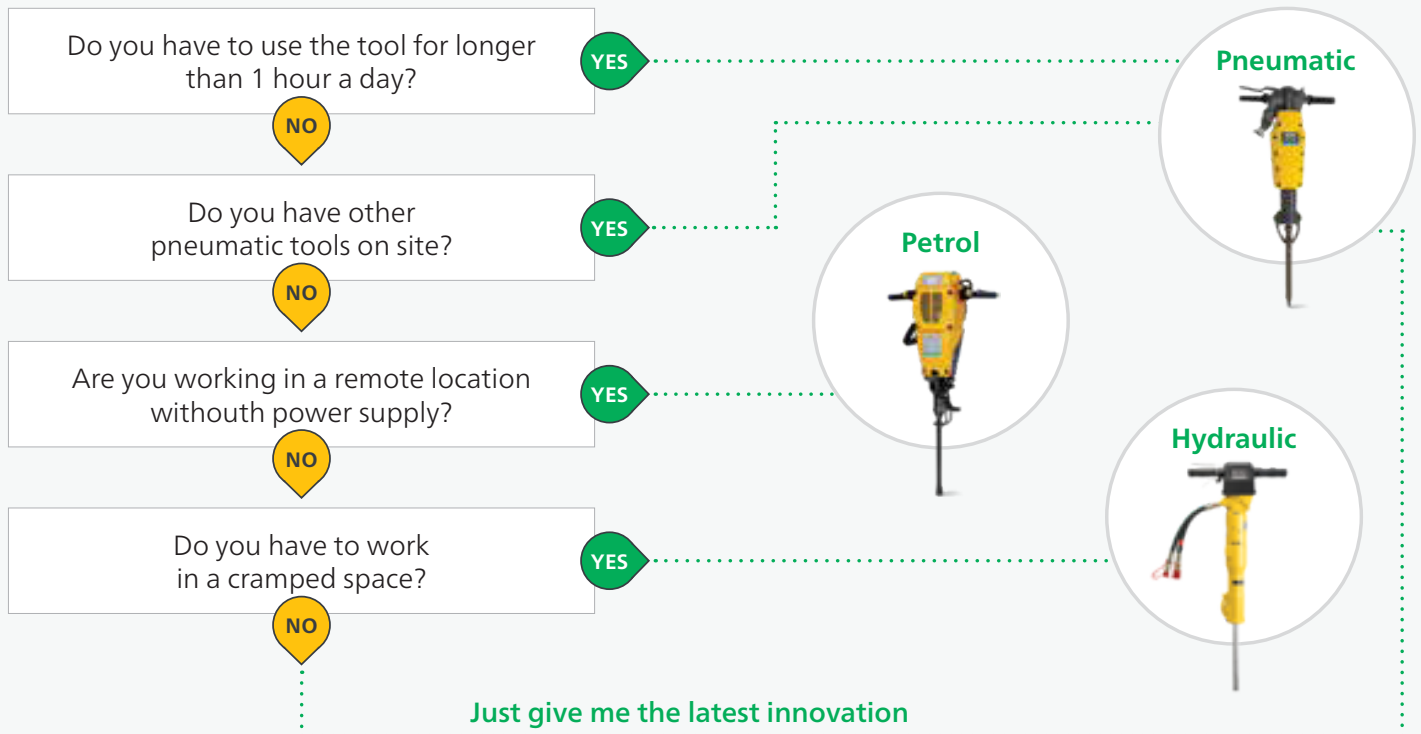

- Ergonomic best-in-class
- The best possible power-to-weight ratio
- Versatile: a tool for every application
- One compressor can power several tools
- Lowest total cost of ownership

Petrol-driven tools:

- Full autonomous
- Ideal for remote locations and disaster areas

Hydraulic tools:

- Ideal when space is limited
- Compact and fast set-up

Portable submersible pumps

At Atlas Copco, we understand pumps, their applications and, most importantly, the people using them. We have a complete range of high-quality and lightweight electric submersible pumps designed specifically for drainage, sludge and slurry pumping applications and available in global voltages.

WEDA pumps are made for durability. The unique sealing system and modular design make them among the most flexible pumps on the market. Easy to use and maintain, WEDA pumps promise optimal performance. The WEDA seal system is designed to provide the optimum maintenance solution and can be easily fitted at the job site.

WATER DENSITY UP TO 14.18 lb/gal	SOLIDS HANDLING UP TO 2.5 inch	UP TO 40% LIGHTER IN WEIGHT	HIGH WEAR RESISTANCE
---	---	--	-----------------------------

Diesel surface pumps

The surface dewatering pumps range are designed and developed to offer high performance, reliability and ease of use across multiple industries for applications like construction and mine site dewatering, removing floodwater, and other municipal applications.
