---

### Timely parts delivery for efficient maintenance

Staying on top of maintenance is key to reliable performance, cost control, and extending asset life. Parts Care delivers genuine parts tailored to your operating conditions; each shipment timed to align with your tailor-made maintenance schedule.

---

## How can you improve maintenance efficiency and reduce administrative costs?

Manual management of spare parts can be inefficient, requiring significant resources and potentially resulting in missed service deadlines and higher costs. Our solution optimizes this process by automating the delivery of genuine parts and oils at a known price, with a single purchase order.

## How does timely delivery of genuine spare parts help you maintain consistent vacuum performance?

In our experience, routine maintenance minimizes the likelihood of unexpected failures and helps the equipment operate at peak efficiency. Authentic parts are provided as needed, facilitating adherence to the planned maintenance schedule.

## How do genuine spare parts enhance the performance of your vacuum system?

Using parts designed for equipment can contribute to safety, reliability, and longevity of assets. Atlas Copco provides spare parts that are designed according to established specifications and assessed for performance.

**Genius**  
INSTANT INSIGHTS™

To help you minimize the total cost of ownership and benefit from proactive service support, your equipment under **ServicePlan™** is connected to **GENIUS Instant Insights™**, an intelligent remote monitoring solution that provides real-time updates on equipment performance, energy consumption, and CO<sub>2</sub> footprint. You have the possibility to receive customized recommendations from our vacuum experts, giving you the insights needed to make informed decisions and optimize your maintenance strategy.

\*Only compatible with select vacuum equipment models.
